Security & Safety Magazine 2011: Editorial Plan of Access Control Section

We continue to announce Editorial Plans of Security & Safety Magazine Sections for 2011. In 2011 Access Control Section of S&S Magazine will be dedicated to the following subjects: Access Control application practice at the enterprisers of different size and different industry sectors; review of the new products which were presented at major industry events, technical reviews, opinions and comments from leading industry experts and many other interesting and actual information. Besides, we plan to expand the subject of effective collaboration of different market players: from suppliers to the end-users. End-users' attention will be drawn by special materials: "School For End-users" – practical examples of the Access Control Systems organization.
