Making the difference in Education

Enhancing communities through
Education

1. About jp.ik

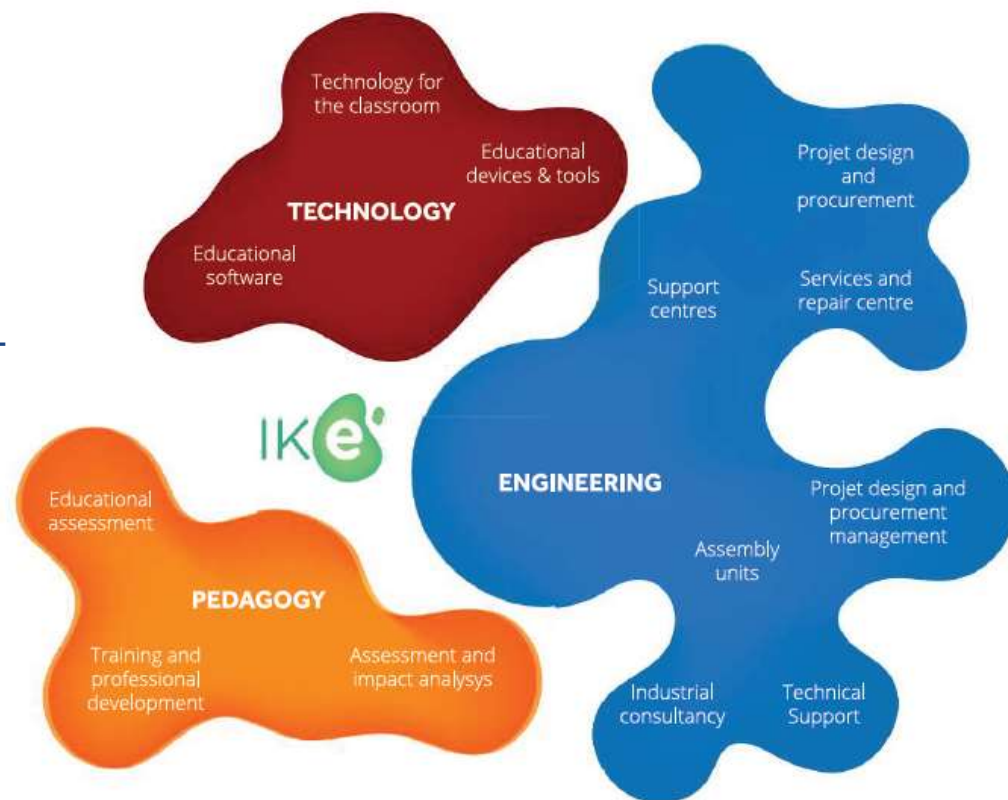

About jp.ik

jp.ik is the jp.group's business unit specialized in the implementation of innovative and sustainable Educational solutions. The knowledge acquired in projects developed around the world makes jp.ik the referral partner to create, integrate and boost technology in Education.

The integrated approach developed by jp.ik – “Inspiring Knowledge Ecosystem” – covers three key pillars of a technology-based educational project: Technology, Engineering and Pedagogy. With the educational ecosystem, jp.ik moves beyond delivering technology, assuring the knowledge transfer as a key success factor for the long-term sustainable development of communities.

Making the difference in Education

2. Digital Literacy Programme

The Kenya project

Digital Literacy Programme The Kenya project

In 2013 the Kenyan Government kicked off the Digital Literacy Programme built upon a multi stakeholder approach with the participation of several government organizations, committing to the integration of ICT in every single public Primary Schools of Kenya.

jp.ik's expertise and know-how in the field of Education was recognized and jp.ik won 2 from the 3 batches of the public competition to implement this initiative.

Digital Literacy Programme The Kenya project

The Kenya project touched all three pillars of the Inspiring Knowledge Ecosystem:

Engineering

Set up of an assembly plant which accommodates a post sale service and a call center in Moi University

**13.500 digital
classrooms
delivered**

Technology

Set up of digital classrooms and delivery of devices to students and teachers

**30.000
teachers
trained**

Training

Capacitation of teachers, students and assemble plant workers in accordance to their skills and job specifications

**695.000
students
impacted**

3. jp.ik Popup School

Enhancing communities through
Education

jp.ik Popup School

The concept: a multipurpose solution

- Fully integrated solution with a simple and fast implementation process that can deliver a sustainable school for communities in need of a quality infrastructure.
- Based on modular building, it is designed to be flexible and can be customized. Due to its flexibility and fast set up, it is the ideal solution for remote areas, where students have to travel long distances to attend school.
- It may be used as a health center, a community center or even an emergency school in refugee camps or conflict-affected areas.

jp.ik Popup School

The structure: durable and resistant

- The structure is designed to meet and exceed the most stringent green building criteria for schools, combining cutting-edge technology with recycled and low-emitting materials.
- The modular construction makes it easy to assemble, disassemble and relocate, even in areas of difficult access.
- Includes solar panels, making it a fully self-sustainable solution.
- Can withstand heavy damage and has an estimated life span of 25 years.

jp.ik Popup School

The ecosystem: flexible and technologically advanced

- The interior can be transformed, allowing for different uses. The classroom can be turned into a gymnasium for physical education classes or a community center, for example.
- All technological equipment, from students' and teacher's devices to the interactive whiteboard, and other support equipment, is supplied by jp.ik.
- Since the Popup School can also act as a community center, that means that everyone in the community can make use of it and benefit from all the resources of the space, including the access to Internet.
