Что делать?

A satellite image of Earth from space, showing the Arctic region and surrounding landmasses. The image is split vertically, with the left half showing a darker, more detailed view of the Arctic and the right half showing a lighter, more cloud-covered view. The Earth's curvature is visible on the right side.

Решение проблемы

The screenshot displays the SMART Camera software interface. The top menu bar includes options like Devices, Archive, Detection Tools, Programming, Users, Options, and System log. A sidebar on the left shows a tree view with 'Server' and '15. Monitoring' expanded, highlighting 'Onboard Tracker'. The main window is titled 'SMART Camera' and features a 'Live Camera' section with a sidebar menu containing 'Events', 'Settings', 'Analytics', 'Perspective', 'Ignore Area', 'Classification', 'License', and 'About'. The central area shows a live video feed of a parking lot with several cars. Overlaid on the video are tracking data: a blue box with '4' and '10' for one car, and a green box with '776' for another. A status bar at the bottom right of the video feed displays: 'Client/server frame rate: 24.7 / 24.2', 'Bitrate: 0 kbit/sec', and 'Client/server frame size: 443x300 / 1280x720'. A 'Stop getting events' button is visible above a table with columns: Event ID, Event Description, Event Timestamp, and Object ID. The bottom right corner of the interface has 'Apply' and 'Cancel' buttons.
